## AN ECOSYSTEM FOR HEMP

Kumaon Khand is an ecosystem for Hemp in India. We're the only Indian company to have our own value chain, with seeds to store operations, working from the grassroots in Kasar Devi, Almora, Uttarakhand. We work directly with farmers on the procurement side and then process it in our manufacturing unit in Almora. We have successfully started India's first experiential hemp-stay and Store at Kasar Devi.

## HEMP PROVIDES

With a range of nutritional food, sustainable clothing, natural skincare, and medicinal products, Hemp has applications in almost every industry. For carbon sequestration; with our Hemp farms spread across c. 21,000 sq. km radius of the Kumaon region, we sequester more than 100 tonnes of CO2 in a Hemp cycle.

## EMPOWERING FARMERS

We create village-level entrepreneurs through decent work opportunities and skilled labour and technology adaptation for community value-addition across Uttarakhand Himalayas. We're currently working directly and indirectly with 2000 farmers across the Indian Himalayan region, with more than 99% of them being Women Sub-marginal Farmers and 70% of them from marginalized communities.
